Leak Sealing

The capability to seal water, air, steam, hydrocarbon, gas, chemical and acid leaks.

Safe production and remaining online are priorities across all industrial sectors. Should a leak occur on an asset, plant downtime and associated costs involved are a concern and the ability to seal leaks safely whilst still operating is of great advantage.

ICR can offer live leak sealing solutions to help maintain the integrity of plant and keep systems operating to avoid potential harmful leaks, alongside our existing services; Onsite Machining, Technowrap™ Engineered Composite Repair Solutions and Quickflange™ Weldless Connectors.

WHY ICR?

- From leaking flanges and pipelines to passing valve glands
- Patented ICR clamp design
- Fully designed and engineered in-house
- Integrated offering
- Safe, cost effective and efficient
- Supported by market-leading partners Petroseal; delivering the best quality leak sealing techniques
- We have trained and experienced technicians currently operating 24/7 able to supply bespoke enclosures for flanges or pipelines and undertake repairs from -180°C to 700°C and up to 240Bar.
- We Can Supply A Range Of Pre-moulded Boxes For Service Up To 160°C And 35bar Straights ½" To 10" Elbows 1 1/2" To 6"
