OMNI Asset Integrity Software

COMPANY PROFILE

OMNI Integrity is a new subsidiary company of the ICR Group. OMNI has been established to provide the oil & gas Industry with advanced integrity management software solutions.

PURPOSE

Push the boundaries of possibility through innovation, by using the latest advancements in technology to continually enhance full-lifecycle digital integrity management solutions, giving asset owners complete visibility and control over their integrity threats.

PROMISE

OMNI promises to digitise your entire integrity lifecycle by providing a fully configured software in line with your organisational strategies and procedures, enabling a high level of process automation and bringing new levels of efficiency and transparency throughout your operations.

VISION

To be respected as the global transformational leader and technology partner for digital asset integrity management solutions.

PRODUCT OFFERING

OMNI's software solution offers centralised data capture and integrated full-lifecycle processing, for an end-to-end integrity management capability.

A complete 360° data-capture solution, OMNI can integrate with

technologies, such as Internet of Things (IoT) sensors and mobile tablet technology to cover all inspection and condition monitoring methods (corrosion, operational process and vibration data).

What makes OMNI unique is its ability to carry out real-time analysis, notifying of any defects and enabling closing of the loop through its suite of 5 integrity management modules. Also, OMNI drives organisational cohesion and efficiency through automation of processes, tracking, visualisation and communication functions.

- **REDUCE** overall integrity cycle time by up to 40%
- **AVOID** spreadsheet tracking and management
- **REMOVE** duplication in assessments
- **ENHANCE** Enterprise collaboration and operational efficiency
- **IMPROVE** visibility and control

REASONS TO CHOOSE OMNI

- OMNI is strategically positioned to benefit the digital growth drivers in the market
- OMNI has a flexible, scalable and sustainable business model
- OMNI provides total control and visibility across your Asset
- Flexible on-boarding process which fits with your existing data sets
- OMNI builds cohesion throughout organisations for more efficient operations
